## PROJECTS

---

### CollegHive

It is a dynamic platform designed to connect college students, streamline campus collaboration, and enhance academic and social engagement. Whether you're looking to join student communities, share ideas, explore events, or access academic resources, CollegHive empowers students to thrive in a connected college ecosystem. CollegHive bridges the gap between technology and campus life.

### Image Cartoonifier

It is a computer vision application that transforms real-world images into cartoon-like visuals using a combination of image processing methods

### Face Recognition Attendance System

It is an AI-powered solution that automates the process of marking attendance by recognizing and verifying individuals through facial features. Using computer vision and deep learning techniques, the system captures a live image and stores it then detects faces in real time, and matches them with stored facial data to authenticate identity.
